Oppgave 10b –jQuery

Anh Nguyen Duc

OPPGAVE 1

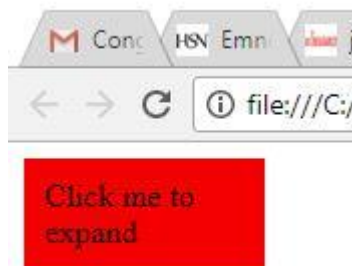

- Set the background color red of the following elements using jQuery
- Tips: using `$('#button1').click(function(){ ... })`

OPPGAVE 2

- Increase the width of a DIV tag by specified pixels once it is clicked.

Before click

After click

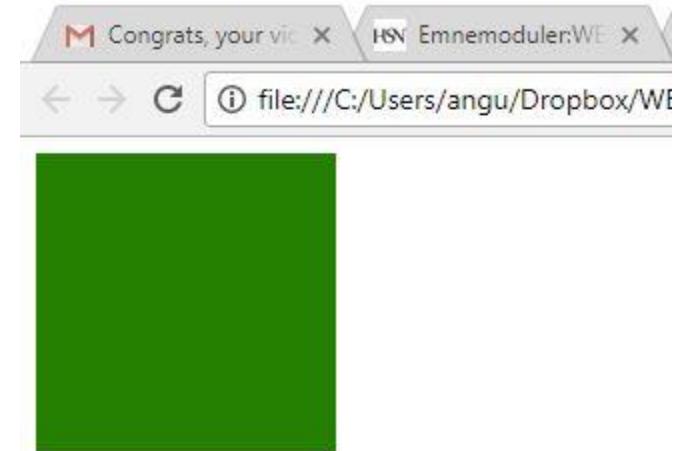

OPPGAVE 3

- Using jQuery right click to toggle background color
- Tips: using `div.toggleClass();`

Right click the block

Right click the block

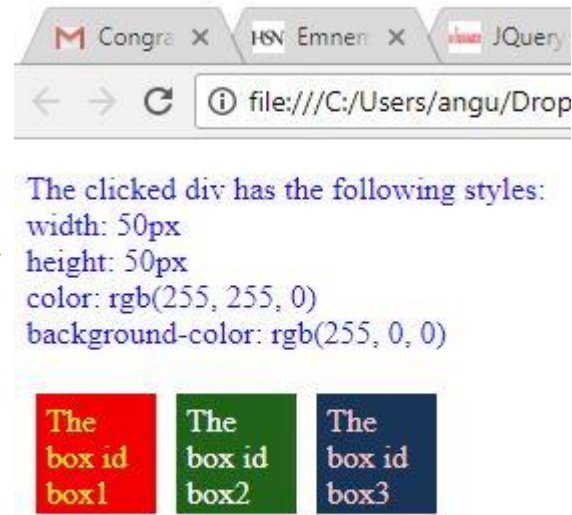

OPPGAVE 4

- Using jQuery get the styles (**width, height, text color, and background color**) of a clicked DIV
- Tips: first, create an arrays of css properties as listed above. Then use **\$.each** to loop through all of the properties, using **html.push**

Normal state

Click on div box1

Click on div box2

Click on div box3

OPPGAVE 5

- Click a word in the paragraph and highlight it
- ```
var words = $("p").first().text().split(/\s+/);
var text = words.join(" ");
// adding Span to every single word in the first paragraph
```
- ```
// todo: add function to change the color when a span is clicked
```
